ZURN COMMERCIAL BRASS AND FIXTURES

Zurn Industries has been designing and producing engineered plumbing products beginning with "Specification Drainage" products in 1900. Since then, Zurn has developed the widest breadth of commercial plumbing products that include: Specification Drainage, Wilkins backflow and pressure regulators, flush valves (manual, sensor operated), commercial food service faucets, traps and supplies, Chemical Waste Drainage, non-freeze faucets and hose bibbs, pressure-balancing shower valves, mop basins and shower bases, PEX Tubing for water systems and hydronic application and Flo-Thru trench drain systems.

ZURN'S NEWEST ADDITION

Zurn's newest addition, "Commercial Fixtures" is a complete line of plumbing fixtures for the commercial and institutional construction market. Zurn "Commercial Fixtures" includes water closets (floor and wall mounted), urinals and lavatories (counter top and wall mounted) and additional specialty products that include: cast iron and porcelain service sinks, clinical sinks and cast iron lavatory sinks. Zurn "Commercial Fixtures" are designed for rigid performance criteria and comply with all applicable codes and standards.

Zurn "Commercial Fixtures" can be combined with Zurn Commercial Brass products to add value to the building developer, design engineer, plumbing wholesaler, design build contractor and water conservation specialist. Marketed as the "Zurn-One Package", this combination provides economic and warranted performance advantage to all aspects of the construction industry.
